## SUMMARY

I am a Computer Science Engineering student at SRM IST Delhi NCR with a strong interest in full stack web development. Alongside my academic pursuits, I successfully co-led and scaled a YouTube channel to over 147K subscribers, where I gained extensive experience in video editing, digital marketing, content strategy, and audience engagement. I am eager to contribute to impactful projects, apply my technical foundation in real-world environments, and grow as a Full Stack Web Developer Intern.

## TECHNICAL SKILLS

- Python
- SQL
- C/C++
- Wordpress
- JavaScript
- Node.js
- Flask
- Git
- HTML & CSS
- Express.js
- React.js
- Next.js

## PROFESSIONAL EXPERIENCE

### Co-Founder & Content Creator

March 2024 - March 2025

- Grew YouTube channel from 0 to 147K+ subscribers through strategic content planning and audience engagement.
- Produced and edited high-quality videos, optimizing SEO and retention metrics for maximum growth.

## PROJECTS

### AI Clipper and Caption Generator ([Link](#))

Tech Stack: Python, Next.js, React, MoviePy, OpenAI Whisper, Google Gemini API, JavaScript

- Built an AI-powered tool that automatically extracts video highlights and generates captions for social media content.
- Integrated OpenAI Whisper for speech-to-text transcription and Google Gemini API for intelligent highlight detection.

### Blogging Platform ([Link](#))

Tech Stack: Python, Flask, SQLite, Bootstrap

- Created a blogging site with post creation, editing, and deletion features.
- Implemented user-friendly UI with Bootstrap and used python , flask for backend routing and data handling.

### Movie Discovery Application ([Link](#))

Tech Stack: React.js, HTML, CSS, JavaScript , TMDb API

- Built a React app to browse movies using the TMDb API with real-time search and filters.
- Designed a responsive UI with client-side routing for smooth navigation.
